Shahid Beheshti University

Faculty of Mathematical Sciences

Department of Data and Computer Science

If you have any question, you can raise it in the WhatsApp group or send a message to the telegram ID : @mmovahed02.

Problem

In this assignment, you should implement a parallel program for matrix multiplication algorithm.

Description

In this part you write a parallel algorithm for matrix multiplication which should be implemented on the GPU platform using CUDA library.

Reporting the running time of the algorithm is mandatory for serial and parallel implementations.

It is necessary to report the specifications of the execution platform in the document. Also you should use comments to explain the codes

Utilities

- Library: CUDA
- Languages: C, C++, Python
